Security

Create account with a crypto address

- [Log in with Metamask](#) by Skiff
- [FAQs](#) > Can I sign into Skiff on mobile using my Metamask wallet?

Multi-factor authentication (MFA)

1. *Settings > Security > Two-factor authentication*
2. Store the new MFA backup codes in addition to the original account recovery file.

Enable decentralized backend

- Select profile (Top-left icon) > *Settings > Account > Storage format > Select Decentralized (IPFS)*.

Block remote content from loading

- [Block remote content on Skiff Mail](#)

Generate a new recovery key

- Disable and re-enable *Account recovery*: Select profile (Top-left icon) > *Settings > Security > De-select and re-select Account recovery*.
- [FAQs](#) > *What should I do if I lose my recovery PDF?*

Audits

- Site: skiff.com/transparency
- Trail of Bits: github.com/trailofbits/publications > *Security Reviews*
 - The audits are not published

Mail

Private addresses

- See [Quick aliases](#)
- Generate private email addresses for different services
- Reply using your generated emails

Custom domains for email

About

- Features
 - Buy, add, manage, and add an unlimited amount of aliases for domains
 - Migrate domains bought on Skiff to another registrar
 - Contact support to receive an authorization code to provide to the new registrar
 - Opportunity: Feature to self-manage domain migration
- All mail received is encrypted with a public key where only a user can decrypt messages
- Site: app.skiff.com/mail?settingTab=custom+domains
- Set the custom email as the default: Select *Settings* in the navigation menu (Left side of the screen) > *Addresses > Email addresses* > Select the overflow menu (3 dots) next to an email > Select *Set default*

Records

- Records (MX, CNAME, and TXT) are auto-configured for privacy if purchasing directly from Skiff
- Manually configure records
 - Skiff MX record must be set at priority zero
 - Copy and paste the other records

Resources

- [Skiff Domains launches!](#)
- [Quick guide: Get your custom domain set up](#)
- [Setting up a custom domain on Skiff](#)
 - *What are the DNS records?*
- [Catch-all aliases released](#)

Back up emails

- Export all email data
 - Select the empty square button in the top-left menu bar > Select *All* > Select the *Export* button (Arrow pointing downwards)
 - Opportunity: [Show mail selection counter](#)
 - Test
 - If attachments are included in .eml backup files
 - Uploading .eml files back into Skiff
 - Select *Imports* (Left navigation menu) > Select *Import mail* button > *Import* button next to your chosen import type
- Bulk backups with .mbox file type in progress: [Provide an export option for mail](#)
 - [Export Emails from Skiff on r/Skiff](#)

Pages

- What you see is what you get ([WYSIWYG](#)) editor for Markdown
- Share with collaborators
- Templates
- Export all files as .docx: [app.skiff.com/drive/dashboard](#) > *Export* (Button in the top-right corner)
- Mobile app: [skiff.com/download](#)
- Google Docs compatibility: Can edit a Google Doc with a Skiff account as a guest user in Google.

Calendar

- Built-in video calls (VC) for calendar events
 - [Add video calls to Skiff Calendar events](#)

- Removing Jitsi integration
 - [Open info](#)
 - [@skiffprivacy Tweet 2023-09-15](#)
- Scheduling: [Schedule on Skiff with Cal.com](#)

Settings

Shortcuts: [FAQs](#) > ~~Does Skiff Mail support keyboard shortcuts~~

Link wallet address

- ~~Use to sign in.~~
- Select profile (Top-left icon) > ~~Settings~~ > ~~Account~~ > ~~Mail~~ > ~~Wallet alias~~
 - ~~Use Chrome or Chrome-based browser~~
 - [MetaMask Option Not Showing in Firefox](#)
- [Signing into Skiff mobile with MetaMask wallet](#) ~~by Skiff~~

Link ENS domain name

- ~~Use to send and receive email.~~
- Must link wallet address first.
